Sprint 2 Report
Product Name: MoodLift
Date: 5/7/24

Actions to stop doing:
- Stop holding meetings in the morning, because people aren't able to make them anymore.

Actions to start doing:
- Send daily updates + blockers to get help in designated discord channel, this will help everyone stay on task and up to date with the project
- Send meeting recaps in the discord - this will help everyone remember what was discussed at meetings

Actions to keep doing:
- Meeting as a group (in-person if possible) - It feels most effective when every person can join the meeting, and in-person meetings can help resolve issues faster.
- Stay on track with planned tasks - We should try to not get behind on planned work in order to accomplish what we need to in each sprint.

Work completed:
- We have a frontend home page, journaling, mood tracking, and resources page
- Design for all pages except mood tracking
- ChatGPT API incorporated, unique journal prompts can be generated

Work not completed:
- Set up the Firebase database
- Beautifying the frontend (not completed)
- Research into Spotify API
- Mood tracker design

Work completion rate:
- User Stories Completed: 1 out of 4
- Task Completion Rate: 60%
- Total Work hours estimate: 21 hours
- Estimated days worked: 8

Final Burn-up chart:
