Sprint 1 Plan:

User Stories to work on:

- {medium} As a student, I need to be able to easily navigate through the app so that I can easily and quickly track my progress. [8 points]
    - {medium} As a busy student, I need to be able to access the journaling section of Moodlift so that I can write about my day and process what happens. [5 points]
- {medium} As a user, I want to be able to write at most a paragraph in my journal prompt so I have enough space to write freely. [5 points]

• Actions to stop doing:
- N/A, early in the quarter
• Actions to start doing:
- Decide on tech stack - We need to do this ASAP so we can start working/learning the necessary technologies.
- Organize scrum meetings - We need to set on certain days/times to have our 15-min scrum meetings.
- Separate/delegate the work for the sprint - It would be easier to work efficiently/cohesively if we discuss who is responsible for what tasks to be finished by certain deadlines.
• Actions to keep doing:
- Meeting as a group (in-person if possible) - It feels most effective when every person can join the meeting, and in-person meetings can help resolve issues faster.
- Stay on track with planned tasks - We should try to not get behind on planned work in order to accomplish what we need to in each sprint.
• Work completed/not completed:
- Completed the general UI design template (on Figma) for each of our pages
- Completed the journaling section of the website to be able to write a paragraph
- Decided on Tech stack
• Work completion rate:
- N/A, early in the quarter
